October 9, 2008

Charles L. A. Terreni, Chief Clerk and Administrator
Public Service Commission of South Carolina
101 Executive Center Drive, Suite 100
P.O. Drawer 11649
Columbia, SC 29211

Mr. Terreni:

On October 1, 2008, I made a brief presentation to the Public Service Commission (PSC) hearing regarding the appeal of Carolina Water Service, Inc. (CWS) of the PSC's denial of their request for rate relief, PSC Docket # 2006-92-WS. This appeal to the South Carolina Supreme Court has been remanded to the PSC for reconsideration. A copy of that presentation is attached.

The hearing was held less than thirty (30) days after the remand order was received by the PSC (September 4, 2008), and, as a consequence, little was known of the basis of the remand or likely contentions on the part of CWS by either the public or, as I understand it, even by the PSC or the Office of Regulatory Staff (ORS).

At the October 1 hearing, Mr. Steven M. Lubertozzi, Vice President of Utilities, Inc., the parent corporation of CWS, gave testimony. In this testimony, there were two primary areas of focus which, to my knowledge and belief, had not been the subject of any substantive comment by CWS in the 2006 hearings. These areas of interest were, therefore, "new news" to the general public including the customers of CWS in Lake Wylie, SC. (the so-called "River Hills" system, which, in reality covers a lot more than the River Hills development.) As a consequence, the public had not had an opportunity to digest and/or to prepare comments on the contentions contained in Mr. Lubertozzi's testimony.

The Two Areas of Focus:

1. Subsidization within and among the various operating entities of CWS in South Carolina:

Depending on how they are defined, there are apparently between thirty-two (32) and eighty-eight (88) CWS operating entities located in South Carolina serving a total of some 22,000 customers. Some of these operations are geographically contiguous and others are not. Some have a degree of operational synergy, while others do not. Mr. Lubertozzi seemed to be saying that subsidization exists to some degree in all utility operations, and therefore subsidization is inevitable and perfectly OK regardless of an operation's characteristics or scope.

Mr. Lubertozzi did not mention that there is no contiguity and no appreciable operational synergy between CWS's Lake Wylie operation and the remainder of the CWS operating entities in South Carolina. These facts weigh heavily on the existence, fairness and equitability of subsidization. He also made no effort to define the level of subsidization. In the case of the Lake Wylie operation, it appears,

with the effect of Docket #2004-357-WS included and the potential effect of Docket #2006-92-WS included, that CWS could be realizing as much as a 58% rate of return on the Lake Wylie rate base. This seems unfair and inequitable, and represents a staggering and unjustifiable subsidy passing from Lake Wylie to the rest of the CWS systems in South Carolina.

2. Difficulties related to breaking out the financial data for the individual CWS operating entities:

The PSC had, in the 2006 hearings, indicated a need to obtain and review, for each operating entity, financial data in a format identical to or reasonably similar to the format of the financial data presented in the original request for rate relief. The PSC indicated it needed this information in order to make an informed judgment on the fairness and equitability of the water and sewer rates in existence and proposed as it related to each of the operating entities.

In his testimony on October 1, 2008, Mr. Lubertozzi gave indication, including approximate cost estimates, that the hiring of consultants and other costs attendant to the development of the requested data might cost as much or more than \$400,000. His contention appeared to be that this cost made it impractical to provide the requested level of information, regardless of its appropriateness or necessity regarding the fairness of the review of the rate relief request.

What Mr. Lubertozzi did not say is that such information in approximately the requested format was provided to then State Representative Ralph W. Norman by CWS in December, 2006. This occurred through the ORS in response to a request from Mr. Norman in August, 2006 while the rate relief case was still under PSC consideration. The information was not, however, received by Mr. Norman until December, 2006 subsequent to the PSC's denial of the CWS settlement proposal. Mr. Lubertozzi also did not say that Utilities, Inc., at a reported cost of some \$15 million, has recently brought on-line a new, highly integrated information system and database. From the content of recent Utilities, Inc. press releases, and other industry sources, it appears the necessary capability should now exist to provide the requested information on the individual CWS operations without major additional expense.

I am attaching as an Appendix to this note, comments directed to Mr. Lubertozzi's testimony. I feel this is very appropriate in that the public had no opportunity to consider and review Mr. Lubertozzi's testimony prior to or during the hearing, and Mr. Lubertozzi's testimony, it appears, will have significant weight regarding the PSC's judgment on Docket #2006-92-WS. I ask for your consideration of these comments.

Thank you for your attention.

Donald G. Long

Appendix

Attachments:

- Copy of the presentation of Donald G. Long given at the PSC hearing on October 1, 2008
- Copy of letter and attachments thereto from Benjamin P. Mustian of the firm of Willoughby & Hoefer, P.A to the Ms. Nanette S. Edwards, Esq. of the ORS regarding a request for information from the Honorable Ralph W. Norman, dated December 8, 2006..
- Copy of Utilities, Inc. June 9, 2008 press release regarding implementation of integrated system and database.
- Copy of cover article from the May, 2008 issue of "Energy Exec" regarding various aspects of the business of Utilities, Inc.

Appendix

Comments regarding the testimony of Steven M. Lubertozzi which Mr. Lubertozzi gave at the South Carolina Public Service Commission (PSC) Hearing regarding Docket # 2006-92-WS held on October 1, 2008 in the Hearing Room of the PSC.

Note: This Appendix supplements the comments in a letter dated October 9, 2008 to the Commissioners of the South Carolina Public Service Commission from Donald G. Long.

Background: Mr. Lubertozzi gave testimony on two primary areas of focus. The first of these areas of focus had to do with the concept of subsidization within and between the various operating entities which Carolina Water Service, Inc. (CWS) operates in the State of South Carolina. The second area of focus in his testimony had to do with the difficulties and costs related to providing financial information for each of operating entities within CWS in the identical format to that provided for the consolidated entities in the original request for rate relief.

The Two Areas of Focus:

1. Subsidization within and among the various operating entities of CWS in South Carolina:

Depending on how they are defined, there are apparently between thirty-two (32) and eighty-eight (88) CWS operating entities with some 22,000 customers located in South Carolina. Mr. Lubertozzi seemed to be saying that subsidization exists to some degree in all utility systems, and therefore it's inevitable and perfectly OK regardless of its characteristics or scope.

2. Difficulties related to breaking out the financial data for the individual CWS operating entities:

The PSC had, in the 2006 hearings, indicated a need to obtain and review, for each operating entity, financial data in a format identical to or reasonably similar to the format of the financial data presented in the original request for rate relief. The PSC indicated it needed this information in order to make an informed judgment on the fairness and equitability of the water and sewer rates in existence and proposed as it related to each of the operating entities. Mr. Lubertozzi gave indication, including specific cost estimates, that the hiring of consultants and other costs attendant to the development of such data might cost nearly \$400,000 or more. His contention appeared to be that this cost made it impractical to provide the requested level of information, regardless of its appropriateness or necessity regarding the review of the rate relief request.

In Response to Mr. Lubertozzi's Contentions:

1. Regarding the importance of and the need for subsidization: In my presentations at the June, 2006 and September, 2006 hearings on Docket #2006-92-WS on behalf of the Lake Wylie Citizens Committee on Water and Sewer Rates, I discussed how, for lack of information specifically about the Lake Wylie system in the rate relief filing, we developed detailed estimates of the rate base, revenues, expenses, and return on the rate base. At that time, we believed that the return on the rate base of the Lake Wylie operation exceeded 30% annually as compared to a "fair" rate of return in the range of 7.0% to 8.0%. Our point was that such a high rate of return on the Lake Wylie operation clearly unfairly subsidizes other CWS systems to the detriment of the Lake Wylie customers.

In August, 2006, our then State Representative, Ralph Norman, made a request to the ORS to have CWS provide, specifically for the Lake Wylie operation, balance sheet, income and expense, and rate of return information in the identical format to that presented in the rate filing for the entire CWS South Carolina operation. The ORS forwarded that request to CWS on August 5, 2006. On October

6, 2006, subsequent to the decision of the PSC to reject the proposed settlement of the rate filing, CWS sent a note to the ORS indicating that they would provide the requested information in December, 2006. On December 8, 2006, under a cover letter signed by Benjamin P. Mustian of the law firm of Willoughby & Hoefer, P.A., CWS provided, for their Lake Wylie operation, a semblance of a portion of the information provided in the rate filing in a similar format.

Please see the attached copy of the attorney's letter and the information provided.

This information purported to show that the Lake Wylie operation was showing a rate of return "Per Books" of 7.98% (See Attachment "A" within the overall attachment, page 2 of 4). Per Books, in the original rate filing, was without giving any effect to either the rate relief asked for in Docket #2004-357-WS and/or Docket #2006-92-WS. Thus, the Lake Wylie operation from CWS's own information was producing a rate of return greater than that proposed in the settlement of Docket #2006-92-WS before that request and the prior request were considered. This would tend to confirm our contention regarding the presence of unwarranted subsidization of other CWS systems.

But there's more. Please note than in the above referenced Attachment "A" on page 1 of 4, under "Maintenance Expenses – Salaries and Wages" is an item of \$485,181. Comparing this to the original filing information shows that this is equal to approximately 68% of the statewide Salaries and Wages for Maintenance. In the same page, under "General Expenses – Pension & Other Benefits" is an item for \$107,608. A comparison to the original filing shows this to be approximately 60% of the statewide expense for this expense category. Over \$592,000 amounting to well over 60% of the personnel related expenses for a system which contains only about 20% of CWS's customers statewide, does only sewage collection and water distribution, and has two to three employees. This seems unreasonable to say the least. When asked about the validity of data such as the apparently unreasonably high personnel costs assigned to the Lake Wylie operation, CWS simply said that they would not provide any further information, without citing any reason why not.

Normalizing these two expense categories to figures in keeping with CWS' statements that Lake Wylie makes up approximately 20% of the statewide totals shows about a 28% annual rate of return before the 2004 and 2006 rate filings, about a 40% annual rate of return including the 2004 rate filing which CWS was granted on appeal, and about a 58% annual rate of return including the Docket #2006-92-WS rate filing. This appears completely unjustified and unjustifiable.

Subsidization of one part of a customer set within a single development by other customers within the same development may be justifiable. To eliminate any and all subsidization in such situations would probably mean different rate structures for each and every customer. While this may be doable, it would be fairly complex and highly subjective. Subsidization from one operation to another where the operations are contiguous may even be justifiable on the same basis. But in the Lake Wylie case, there is no geographic contiguity or operational synergy whatsoever with other CWS operations in South Carolina. Therefore, it doesn't appear that there is any justification for subsidization by the Lake Wylie operation of the other operations in the state to any degree, let alone at the level which apparently exists.

2. Regarding the complexity and cost of breaking out financial data for individual operations:

In December, 2006, CWS was able to break out to their satisfaction the financial data for the Lake Wylie operation in a format very similar to that of the original rate relief request. As mentioned above, when asked about the validity of data such as the apparently unreasonably high personnel costs assigned to the Lake Wylie operation, CWS simply said that they would not provide any further information, without citing any reason why not.

As to whether providing such information is difficult and costly for CWS, Mr. Larry Schumacher, Chief Executive Officer (CEO) of Utilities, Inc. is attributed in the cover article in the May, 2008 issue of the utility industry magazine "Energy Exec" as saying that CWS has invested over \$15 million in a project to re-vamp its Information Technology systems. The article says that Mr. Schumacher came to Utilities, Inc. some 16 years ago from a major national CPA and financial consulting firm where he was a senior manager. At Utilities, Inc., he has held the posts of Director of Corporate Accounting, President, Chief Financial Officer, and, now, CEO.

In a press release on June 9, 2008, Utilities, Inc. announced the implementation and bringing on-line of Oracle's JD Edwards Enterprise One software system as the culmination of "a 2-year, multi-million dollar project..." The system combines customer service and field operation systems with the billing system. Oracle literature on the Enterprise One system says that the system "allows employees to view information from throughout the business at any level of detail through a single, integrated database."

According to the above-mentioned press release, Utilities, Inc. has "approximately 90 subsidiaries, operates over 500 utility systems in 15 states, and serves over 300,000 customers" The "Energy Exec" article says that "Utilities, Inc. has become one of the largest privately owned water and wastewater companies in the country", whose "revenue levels stand at an impressive \$100 million". It would seem surprising in today's business environment for a company such as Utilities, Inc. with a CEO with a strong finance and accounting background not to have a fairly sophisticated financial accounting system. Further, it seems very unusual that such a system would not routinely provide access to balance sheet and income and expense data for each of the 500 utility systems operated.

Please see copies of the Utilities, Inc. press release and the "Energy Exec" article, as retrieved through the Utilities, Inc. web site, which are attached.

Summary:

It appears that the Lake Wylie operation of CWS provides a significant and unjustified subsidy to the other operating entities of CWS in South Carolina. This comes about through a rate of return on the Lake Wylie rate base potentially in excess of 50%. I believe this could and should be prevented and adjusted by immediately separating the rate establishment process for the Lake Wylie operation from the other CWS operations in South Carolina, and, if possible, rehearing Docket #2006-92-WS on that basis.

It also appears that Utilities Inc. should readily, and without excessive cost, have the capability through its sophisticated information systems to provide the information necessary to evaluate the level of subsidy currently in place and likely to result from potential future rate increases. CWS, in fact, provided a reasonable semblance of the detailed financial information requested in December, 2006, but then refused to respond to questions related to the data provided.

Public Service Commission Hearing:

October 1, 2008: 1:30 PM:

Good Afternoon. My name is Don Long. I am a resident of Lake Wylie, SC and have been a customer of Carolina Water Service, Inc for 19 years. I am here speaking as an individual resident of the Lake Wylie area. For your reference, I presented comments on the CWS request for a rate increase at the original hearings on Docket # 2006-92-WS in Lake Wylie and here in Columbia as a representative of a Lake Wylie Citizens Committee on Water and Sewer Rates in June and September of 2006, respectively. I am also a member of the boards of directors of the Lake Wylie Civic Association, the Lake Wylie Chamber of Commerce, and the River Hills Community Association. It's my belief that all these organizations and the residential developments, businesses and individual residents which they represent would subscribe to and support the comments I am about to make. However, the short time between the notice of this hearing and its convening as well as the lack of information about the what and why of this hearing has made it impossible to have these comments meaningfully reviewed by all the interested parties, so the comments are mine alone.

Regarding the matter before you:

- At the time of the original hearings in 2006, the Lake Wylie franchise was reportedly one of 32 CWS franchises in South Carolina and was estimated to produce about twenty percent (20%) of the total CWS revenue in South Carolina. The Lake Wylie franchise was also estimated to contain slightly less than 20% of the Plant in Service, but nearly 35% of the Contributions in Aid of Construction. This, because of the relative newness of the system, would seem to indicate that Lake Wylie is likely to produce a higher than average return on rate base. In addition, the functional level of CWS's participation in the Lake Wylie system appears likely to produce lower than average levels of cost per customer since the sewage processing and supplying of water are done by York County. These factors in combination lead us to believe that the return being achieved on the Lake Wylie rate base is excessively high and that the Lake Wylie system significantly and unjustifiably subsidizes the remainder of the CWS systems in South Carolina.
- I say estimated because at time of the hearings in mid to late 2006, for lack of sufficient detail from CWS, we had to produce our own estimates of revenue and expense, rate base, and resulting return on rate base for the Lake Wylie segment of the CWS system. Because our segment of York County, South Carolina is among the two or three fastest growing areas in the state, the situation is probably even more disadvantageous to the residents of Lake Wylie today than it appeared two years ago. It is likely that greater excesses in revenue and rate base returns exist today than were present at the time of the 2006 rate hearings. At that time it was our belief, supported by what we believed were reasonable estimates of CWS's financial performance in the Lake Wylie area, that CWS was returning in excess of 25% annually on its applicable rate base in Lake Wylie. We further believe that, if you approve the settlement agreement which you previously rejected, the CWS return on the rate base in Lake Wylie is likely to exceed 50% annually.
- There are no other CWS systems geographically close to the Lake Wylie system. Thus there is virtually no synergy between Lake Wylie and other systems regarding personnel or operating assets which make it necessary or desirable to combine our system with others. In fairness, we believe the Lake Wylie system should be separated from the other CWS water and sewer systems in South Carolina for purposes of rate determination. This was, I understand, done in the case of at least one prior rate relief request with respect to the Lake Wylie area.

- I clearly lack the legal training and experience of the learned counsels for CWS, the PSC, and the ORS. Nonetheless, it seems beyond any reason that the Public Service Commission should not have the duty, let alone the ability, to request and be provided with any and all information which the PSC believes and can demonstrate it reasonably needs in order to make determinations on residential and business rates for water and sewer service. These are not services where the public has a choice or where competition provides some measure of "self-regulation". But they are services where the cost can have an effect of the financial well-being of the general public. While certain rules of judicial conduct and procedure may necessarily apply, I'm fairly certain it was not the legislature's intent to tie the hands of the PSC regarding the PSC's ability to obtain what they believe is the necessary information to determine what the overall best and most appropriate decision is for all the concerned parties, most particularly the public.
- As you may be aware, there are discussions taking place between representatives of York County and CWS regarding the possible purchase of CWS's Lake Wylie system by the County. To this point in time, the public is not privy to the details of those discussions. It's apparent, however, that the more profitable the system can be shown to be, the more CWS is likely to ask, and the more that the public would be expected to pay to acquire the system. It is to CWS's advantage in these discussions to be able to add to what we believe is the already excessive revenue stream and profitability of the Lake Wylie system. Thus any decision on the PSC level to approve what we believe is an unjustified 2006 request for rate increase will likely detract substantially from York County's and the public's leverage in negotiating a fair and equitable price for the Lake Wylie system.
- I believe it's important for the Commissioners to understand the difficulties which the public faces because of the lack of information provided and the apparently unaudited way in which some of it is provided. For example, in early August of 2006, about a month prior to the PSC's determination to deny CWS's request for rate relief, our then State Representative, Ralph W. Norman asked CWS through the ORS to provide financials for the Lake Wylie system in the same format as that provided for the overall CWS system in the original rate relief request. Two months later, in October, CWS sent a note that they would comply with the request, but that it would take yet another two months to do so. When, after four months of waiting, the information was finally provided in December of 2006, it purported to show that the Lake Wylie system was producing nearly an 8% rate of return on the applicable rate base prior to the effect of the 2004-357-WS request for rate relief which was still under appeal and the 2006-92-WS request for relief which is before you now. A major component of the financial statements leading to the 8% conclusion was that 68% of the total CWS personnel expense for the entire state of South Carolina was assigned to Lake Wylie. When this gross error was adjusted, the rate of return on the rate base in Lake Wylie appears to go up to over 27%. When effect was given to the increased revenue from 2004-357-WS, the return on the rate base of the Lake Wylie system goes up to over 40%. When effect is given to the 2006-92-WS request which you are now considering, the return on the rate base for the Lake Wylie system increases to over 58%.
- I don't in any way question the technical appropriateness of this hearing in response to the remand from the South Carolina Supreme Court. I must admit, however, that a process which, with regard to an issue of this importance, provides no information prior to the hearing regarding the nature of what will be presented at the hearing or why it is being presented, not to mention that it occurs in less than 30 days, seems somewhat strange. Despite several conversations with staff and counsel at the PSC and ORS, I have come here today without any detailed basis for comment other than a basic understanding that this matter is of great importance to the residents and businesses in the Lake Wylie area. We hope that you will continue, as you have in the past,

to recognize just how important this is. And we suggest that you should continue to demand the information necessary to realistically and reasonably consider this request, and continue to deny this unjustified and unreasonable request for rate increase.

- In summary, we believe you made not only the technically correct decision, but the only fair and equitable decision in denying CWS's 2006 request for rate relief. We believe that the Lake Wylie system provides a return on the Lake Wylie rate base which already exceeds 40% and, with the 2006 request may well exceed 50%. This is likely playing into the negotiations for the purchase of the Lake Wylie system by York County by making it appear that the Lake Wylie system is of much greater value than it actually is. This, in turn, will place a continuing gross and unjustifiable burden on the citizens and businesses in the Lake Wylie area regarding the costs of their water and sewer service. Please reject this settlement agreement and any further attempts to put in place this unwarranted request for rate increase.

Thank you for your time and attention.

RE: August 3, 2006 Request of Representative Ralph W. Norman

Dear Ms. Edwards:

By way of your letter dated August 5, 2006, the Office of Regulatory Staff ("ORS") informed Carolina Water Service ("CWS") that the Honorable Ralph W. Norman sought responses to certain requests for information regarding the Riverhills service area and system to the extent the information could be produced. Thereafter, in our letter dated October 6, 2006, CWS notified your office that it would compile and deliver certain information by December 8, 2006.

In compliance with that letter, CWS herein responds to the requests for the following information:

- 1) The services provided.

Response: CWS provides water and wastewater services in the Riverhills service area.

- 2) Balance sheet and operating revenue, operating expenses, net operating income and rate base rate of return in the identical format and detail contained in Schedules A, B and C of the CWS application in Docket No. 2006-92-WS.

Response: Please see Attachments A and B.

- 3) Customer types (water and/or sewer) and customer classes (residential/commercial etc) with the number of customers at the beginning and end of the test year and projected as shown in the application in Docket No. 2006-92-WS.

(Continued . . .)

Nanette S. Edwards, Esquire
December 8, 2006
Page 2

Response: Please see Attachment C containing the consumption analysis by customer code. Included in Attachment C is a legend defining bill codes and the corresponding customer class.

- 4) The dollar amount of the pass through charges for each customer type and class contained on an average customer's monthly bill.

Response: The Utility receives and pays two invoices per month – one for purchased water and one for purchased sewer. These invoices do not contain cost by class of customer. Pursuant to its authorized rate schedule, the Utility passes these charges through to each customer on a pro rata basis without markup. However, CWS has attached as Attachment D recent invoices demonstrating the rates currently charged. In addition, for the twelve months ended 2005, the Company paid York County. For the twelve months ended, the Utility paid York County \$599,566.61 for purchased water and \$584,001.36 for purchased sewer.

- 5) The rate charged by any government body or agency or other entity for purchased water and/or sewer treatment.

Response: Pursuant to its rate schedule, the York County Water and Sewer Department ("YCWS") charges the Utility \$3.26 per 1000 gallons for bulk water service. YCWS also charges the Utility for bulk wastewater service pursuant to the following schedule:

<u>Base Charge</u>	<u>First 10,675,000 Gal.</u>	<u>Each Additional 1,000 Gal.</u>
\$931.88	\$3.64/1,000 Gal.	\$1.94/1,000 Gal

- 6) The dollar amount of expenditures for infrastructure improvement by CWS and the dollar amount of infrastructure improvements from Contributions in Aid of Construction for the past 5 years and the projected for the next 5 years.

Response: Since 2001 the Utility has spent \$779,000 on capital infrastructure improvements and has received \$914,000 in contributions in aid of construction. The Utility assumes these trends will continue in the future. Additionally, please see the Utility's 2001 and 2005 trial balance, enclosed as Attachment B.

Utilities, Inc. Launches New Customer Care and Billing System

NORTHBROOK, Ill. – June 9, 2008 -- Utilities, Inc. (UI), a national water and wastewater service corporation, announces the implementation of Oracle® Utilities Customer Care and Billing System. The new system which went on-line June 2, represents the culmination of a 2-year, multi-million dollar project that also included the implementation of Oracle's JD Edwards Enterprise One in December 2007. This new system will replace the current billing system by combining both the customer service and field operations systems with the billing system, thereby allowing Utilities Inc. to standardize rate schedules maintained across operations and augment its reporting capabilities. Larry Schumacher, President & C.E.O. said "that we are excited to have this long awaited new tool in service. This system will allow us improved access to information, further enhance UI's customer focus and improve the customer experience overall."

About Utilities, Inc.

Utilities, Inc. was formed in 1965 to provide developers with an alternative method to obtain water and wastewater utility service. Today, Utilities, Inc. is a portfolio company of AIG Highstar Capital, and through its approximately 90 subsidiaries, operates over 500 utility systems in 15 states and serves over 300,000 customers.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

Utilities, Inc.

A thirst for innovation

Utilities Inc., formed in 1967, has become one of the largest privately owned water and wastewater companies in the country

Written by Fiona Nicolson and Produced by Robert Tuneburg

In its earlier years, Utilities Inc., a company formed in 1967, focused on acquisitions and formations in the Midwest, before expanding its operations into the South East. Then, in the 1980s, a major opportunity was identified, that would take the company to the next level.

The result was that Utilities, Inc. made a number of large multi-state acquisitions of utility companies that were not compliant with the Safe Drinking Water Act of 1974 and the Clean Water Act of 1977. It then improved the facilities of these companies, so that they not only met the legal mandates, but exceeded them.

Nowadays Utilities Inc., which is headquartered in Northbrook, Illinois, operates across 17 states, through around 90 or so subsidiaries. It delivers the complete water cycle, meaning that both water and wastewater are provided, to over a million people in total.

Larry Schumacher took over the role of CEO of Utilities Inc. less than a year ago, but he is no newcomer to the challenges of the water industry.

Previously a senior manager for Deloitte Touche, Schumacher's accountancy training has provided him with an eye for the bottom line

UTILITIES INC. HAS INVESTED A TOTAL OF \$150 MILLION BACK INTO THE BUSINESS

and his business acumen has been further sharpened by the rigors of an MBA. He joined Utilities Inc. 16 years ago as director of corporate accounting and was subsequently promoted to the positions of president and CFO, before moving into his current role.

THE FUTURE IS BRIGHT

Utilities Inc.'s current revenue levels stand at an impressive \$100 million and Schumacher confidently expects

this figure to increase: "We are estimating a growth in revenue of around eight to ten percent," he confirms.

However, there is no sign of complacency. On the contrary, the focus is on continuing improvement. Utilities Inc. is currently undergoing a major re-vamp of its IT systems which is expected to have a positive impact on the streamlining of business processes.

"We've invested over \$15 million

in this project," says Schumacher. "This will enable us to mechanise a number of tasks that are currently operated on a manual basis, which will allow us to make significant efficiencies."

The new system will also facilitate an analysis of the links in the company's supply chain: "We're looking to review and enhance our relationships with a wide range of organisations along our supply chain, including chemical suppliers, lenders, legal professionals and others," Schumacher explains.

He adds: "We envisage that our new IT system will enable us to improve our purchasing processes and once it is place we can consider the integration of additional IT tools to further enhance other internal processes."

In the last two years, Utilities Inc. has invested a total of \$160 million back into the business in the form of capi-

tal improvements.

"We've deployed the investment through a number of projects throughout the organisation. They are all different, but what they have in common is the goal of improving our services to customers and our commitment to the environment," says Schumacher.

One of the projects relates to the company's fleet. "We are looking for ways to be more conscientious in our energy consumption, so we are currently testing various hybrid vehicles."

Another example of Utilities Inc.'s green credentials is that it makes effective use of reclaimed water, by recycling wastewater through a highly engineered treatment system.

While it is not suitable for drinking, it is often of a higher quality than many existing surface and groundwater sources and is therefore perfect for irrigation of golf courses, nurseries, residential landscaping and other public access areas.

"We are estimating a growth in revenue of around eight to ten percent"

Larry Schumacher

REACHING NEW HEIGHTS WITH THE EXPANSION OF THE COMPANY'S BUDGET

Some CEOs, when asked, might name an acquisition, a deal, or something else they can measure in financial terms, as the company's biggest achievement. Not Schumacher. "What I'm most proud of is not easily quantified in facts and figures – it's our ability to recruit and retain some very talented people," he says.

Utilities Inc. currently employs 500 people, which is deemed to be the optimum level for the moment. "We don't need to recruit further as we have pretty much the right number of people for what we're undertaking at

COMPANY AT A GLANCE

Company Name: Utilities Inc.

Established: 1945

Headquarters: Northbrook, IL.

Employees: 500

Utilities, Inc. is a holding company for over 75 subsidiary operating companies that provide water and wastewater services to customers in numerous states.

the moment," says Schumacher.

Staff training is characterised by an emphasis on safety: "As our Chief Operating Officer often tells her staff, we want our employees to go home in at least as good a condition they came to work in, if not better," Schumacher explains.

Compliance training is another top priority: "We have a lot of rules and regulations in this industry, so compliance are crucial," Schumacher says. "As Utilities Inc. operates across 17 different states, each with its own jurisdiction, we have the added chal-

lenge of having to comply with lots of different regulatory requirements."

THE FUTURE

Looking ahead, it is unlikely that there will be any fundamental changes to the strategic direction of the company: "What makes us successful is quite simple," Schumacher claims, "we don't try to expand beyond our core competencies. We stick to what we know best and we know it inside out."

Schumacher also outlines a clearly defined approach to the company's

THE COMPANY'S PORTFOLIO IS UNDER REVIEW

"We don't try to expand beyond our core competencies – that's why we are a success"

target markets: "Our customer base is 90 percent residential and we would describe the remaining ten percent as light commercial. The proportion of this split helps insulate us from the impact of economic conditions on the business market. We plan to maintain this marketing strategy."

There could be some movement in the company's portfolio of holdings, however, as this is under review. "We will continue to expand in some areas, as we did recently in Arizona, when we acquired Perkins

Mountain Water Company, which gave us 40,000 new customers," says Schumacher: "But we also foresee the possibility of exiting from other states if we conclude there are no opportunities for additional growth."

While he is positive about Utilities Inc.'s plans for the future, Schumacher has some concerns about the state of the water industry as a whole: "It will continue to require a tremendous amount of capital investment," he emphasises. "The infrastructure needs to be replaced." ■
